

Integrated Management System Policy

ACL S.r.l. aims to strengthen its position as a key partner for its customers by providing both standard and customized solenoid valves, designed according to criteria of high quality, reliability, and flexibility of use. Since 2021, the company has been part of the CEME Group, sharing its core principles related to compliance with quality standards, the development of innovation, and the promotion of environmental protection as well as health and safety in the workplace.

ACL S.r.l. is committed to implementing and maintaining an Integrated Management System in compliance with UNI EN ISO 9001:2015, 14001:2015, and 45001:2018 standards, with the active involvement of all company functions. Each employee contributes, within their responsibilities, to the continuous improvement of processes, the achievement of customer satisfaction, the consistent quality of products and services, environmental protection, and the assurance of safe and healthy working conditions.

Top Management recognizes the Integrated Management System as an essential strategic element and, in order to achieve company objectives, is committed to:

- ensuring compliance with the requirements of UNI EN ISO 9001:2015, 14001:2015, and 45001:2018 standards;
- ensuring compliance with applicable legal provisions and regulations, operating in a responsible and compliant manner;
- analyzing and periodically reviewing the internal and external business context, identifying risks and opportunities for the continuous improvement of the system;
- meeting the requirements and expectations of customers and stakeholders;
- establishing measurable objectives aimed at the continuous improvement of product and process quality and the reduction of environmental impacts;
- ensuring safe and healthy working environments, preventing injuries and occupational diseases through hazard elimination and risk reduction;
- developing personnel competencies related to production processes and quality control;
- promoting awareness and training on environmental and health & safety issues, fostering a corporate culture oriented toward prevention and continuous improvement;
- optimizing the use of natural and energy resources, reducing consumption;
- preventing and reducing forms of pollution affecting air, water, and soil;
- promoting the recovery of production waste within the production cycle;
- encouraging waste separation, prioritizing recovery over disposal;
- ensuring consultation and active participation of workers and their representatives in decision-making processes related to health and safety;
- communicating transparently its commitment to quality, environment, and safety to all interested parties, including authorities, employees, suppliers, and customers.

This Policy represents the reference for defining and reviewing objectives and related targets, which are formalized and monitored within the Integrated Management System.

The Policy is made available to interested parties and is subject to periodic review, at least annually, in order to ensure its continuous updating. All personnel are required to comply with and apply it.
